

TRACKED TOOL CARRIERS

ERKULE

RABAUD is launching a new ultra-compact tracked tool carrier that combines power, versatility and manoeuvrability. Designed to accommodate a wide range of accessories, it meets the needs of professionals in landscaping, construction and maintenance of green spaces, even on the most difficult terrain.

Equipped with a multifunction hydraulic mast, this tool carrier can be fitted with a wide range of accessories: pruning blade, pallet fork, earthmoving bucket, forestry mulcher, auger, post driver, bal-eye...

Thanks to its quick-release system, tools can be changed in just a few minutes.

The hydraulic mast can be raised to a height of **2.70 m** and has a **lifting capacity of 335 kg**, making it easy to trim hedges, drive in posts or load materials. An integrated tilt cylinder further improves the precision of movements.

At the end of the arm, there are two double-acting lines (13 l/min) and one double-acting line (36 l/min) powered by a dedicated pump, ensuring optimum hydraulic power without impacting forward speed.

Press Release

At **only 85 cm wide**, this crawler can be easily transported in a trailer or van. Its compact size allows it to access the most confined sites, passing through gates and narrow passages with ease.

Mounted on tracks, it is perfectly suited to uneven terrain and can climb **slopes of up to 25°**.

The unit is powered by a **23 hp VANGUARD petrol engine** with electric start and fully enclosed for optimum protection.

The mini-excavator-style controls are grouped together on a central console for simple and intuitive operation.

A footboard allows the user to remain on the machine while working, which is particularly appreciated during linear operations such as pruning or sweeping.

Designed to simplify the daily lives of professionals, this new tool carrier combines the manoeuvrability of compact equipment with the power and reliability of professional equipment.

Numerous compatible accessories:
